About Us

Carnegie Mellon University (CMU) is a world class institute of higher education. Founded in Pittsburgh USA in 1900, the University is consistently ranked among the top 25 universities in the United States in the renowned US News and World Report school rankings. CMU is a private, global research university and is home to internationally recognized research and innovation. We are proud of our continuing legacy as one of the world’s most successful universities in bringing ground-breaking ideas and enterprises to the global marketplace.

The First International University in Australia

At the invitation of the South Australian Government, CMU opened its Australian campus in Adelaide in 2006. Located in the heritage-listed Torrens Building in Victoria Square, CMU was the first international university to be established in Australia. Our Australian campus (CMU-A) establishes CMU’s presence in Asia, making it a vital partner to other CMU extension campuses in Silicon Valley, Rwanda, and Qatar.

Ramayya Krishnan
Dean, H. John Heinz III College

“When you come to Adelaide, you will be instructed by world class faculty with diverse backgrounds from around the globe. Through an initiative we call C-cube – Create, Connect and Collaborate – students will take courses and engage with fellow students from the university’s Pittsburgh and Washington DC’s campuses. I invite you to learn more about Carnegie Mellon University’s programs, faculty and student experience offered in Adelaide.”

Emil P. Bolongaita
Head, CMU Australia

“CMU-A offers extraordinary educational and career advancement opportunities for those seeking to study information technology, information systems, and public policy and management. Three factors describe our DNA as a university; the first is our commitment to excellence, demonstrated by our world-class faculty and staff. The second is our record of performance which is reflected in the accomplishments and entrepreneurship of our alumni. The third is our relentless pursuit of innovation, proven by research and development outcomes and intellectual property that is often sought after by the market. These three factors combine to ensure that we produce graduates who can add tremendous value wherever they apply themselves. On behalf of the faculty and staff of CMU in Australia, I am delighted to welcome you to our campus in Adelaide, South Australia.”
An American Degree
A Global Education

Why Carnegie Mellon Australia

- Degree awarded by CMU Pittsburgh
- World-leading faculty and interdisciplinary curricula in Technology, Analytics, Policy and Management
- Support for internships with Australian and international organisations, and major private firms in Asia-Pacific region
- Real-world training through work in industry-based projects
- Dual hemisphere opportunity: experience an exchange semester at CMU Pittsburgh or pursue a global program: first year of study at CMU-A and second year at CMU Pittsburgh
- Acquire a two year post-study work visa in Australia after completion of 21 month program
- Small group learning environment with other top international students
- Access to a global community of more than 100,000 alumni in 140+ countries

Life at Carnegie Mellon University

At Carnegie Mellon, we offer students an extensive range of support programs and services to help them settle and make the most of their time in the university.

Career Services

The Career Services Office provides a range of services and activities to help our students make the most of their degree. Services include job search assistance, resume and cover letter reviews, interview preparation, and salary negotiations discussions. The Career Services Office organizes workshops on interview techniques, business etiquette and networking skills, and works closely with employers to promote graduate employment opportunities.

Student Representative Committee

The Student Representative Committee plays an important role in the effective communication between the student body and university administration. It is also responsible for the organisation and management of student social activities. Each year, the committee organises several on-campus and off-campus events aimed at bringing the student community closer together.

Student Ambassador Program

The Student Ambassador Program is a voluntary extra-curricular program open to all CMU-A students. The program is aimed at students who would like to share their knowledge and experiences at CMU-A with prospective students. They serve as the university’s brand ambassadors and assist in the marketing and outreach of the university to the community.

Student Welfare Services

We provide students with a range of student welfare services designed to cater to student safety and religious and support needs. For more information, please visit www.australia.cmu.edu/student-experience/student-services.
Adelaide is an exciting place to visit, live, or work and has been ranked by The Economist as the fifth-Most Liveable City in the World for the third year running.

Adelaide has one of the lowest cost of living expenses compared to other capital cities in Australia. Living costs such as accommodation, food and other expenses are estimated to be approximately $22,000 AUD per year.

Cost of Living

Adelaide is Australia’s most affordable mainland capital city

Ranked as the fifth-most liveable city in the world

Adelaide has a Mediterranean climate, which means students will enjoy four distinct seasons.

There’s never a dull moment in the Festival State. Whether it’s comedy, theatre productions or world class music, no other city hosts events like Adelaide does.

Accommodation

Once you have accepted your place at CMU-A, our support staff will provide you with a comprehensive list of accommodation options and services to make choosing your short and long-term accommodation easier.

Part-time Work

Under current visa regulations, students may work up to 40 hours per fortnight during term time, and unrestricted hours during published University holidays. For more details, visit www.border.gov.au.
The MSPPM degree is a master’s degree program that instructs students on leveraging data and technology in order to analyze, affect, and implement policy solutions to societal problems and opportunities for positive change. No other place brings information technology, leadership development, quantitative policy analysis, and communication skills together like Carnegie Mellon University. Our innovative and skills-based curriculum equips you with a data-driven approach to solving problems and the ability to work in talented multi-disciplinary teams.

Specialisations

Digital Transformation and Analytics
This specialisation trains students to use data to generate evidence-based and predictive policy options, communicate those options, and implement and evaluate them.

Public Private Partnerships
This specialisation examines the management issues of public-private partnerships and draws heavily upon the involvement of practitioners from within governments and relevant private sector firms.

Careers

Our MSPPM graduates are employed in every sector of the global market and in virtually every industry. They work for large, established organizations and for emerging companies. They are employed in positions such as Policy Advisers, Chief Strategy Officer, Budget Analyst, managers and consultants. Their work covers every functional area found in national and local governments, non-profit organizations and private firms. Senior roles of graduates include Ambassador to World Trade Organisation.

Tracks

12-Month Track (CRICOS Code 056767A)
Designed for applicants with 3 or more years of professional experience, the 12-month track provides the MSPPM degree in an accelerated format comprised of 3 semesters of coursework over one year.

21-Month Track (CRICOS Code 056555B)
Tailored for applicants with limited work experience, students will gain crucial knowledge in quantitative management and evidence-based problem-solving, as well as in effective communications and strategic thinking. The track is comprised of 4 semesters of coursework and 1 semester of internship work.

Jose Morea, MSPPM
Under Secretary and Finance Head, Public Private Partnership (PPP) Unit – Ministry of Finance, Argentina
## Core courses and electives

### MSPPM Core
- Applied Economic Analysis I
- Applied Economics Analysis II
- Business Intelligence and Analytics
- Cost-Benefit Analysis
- Decision Making Under Uncertainty
- Financial Analysis
- Introduction to Database Management
- Organisational Design and Implementation
- Policy Analysis I
- Public Finance: Theories and Cases
- Professional Writing
- Statistical Reasoning
- Strategic Planning
- Strategic Presentation Skills
- System Synthesis

### Digital Transformation and Analytics Core
- Data Mining
- Digital Transformation
- Public Policy Analytics: Cases and Issues
- Geographic Information Systems
- Plus a 12-unit Digital Transformation and Analytics Elective

### Public Private Partnerships Core
- PPP I: Theory and Design
- PPP II: Developing Countries Practice
- Corruption, Democracy and Development
- Business and Government in Asia
- Plus a 6-unit Public Private Partnerships Elective

### Systems Synthesis Project
(for 12-month and 21-month track)

This is a faculty-supervised project in which students work as a team to recommend solutions to a challenge posed by an external client organization. This activity is designed to enable students to integrate the knowledge and skills they have learned in order to develop solutions to problems in the public sector.

### Internship
(only for 21-month track)

You will undertake 400 hours of internship with public or private sector firms or non-government organisations to gain in-depth real-world work experience.

### Pittsburgh Exchange
(only for 21-month track)

Students enrolled in 21-Month track may participate in the exchange program for one study period but must spend their first and last semester in Adelaide.

### Post Study Work Visa
(only for 21-month track)

International students enrolled in the 21-month program may be eligible for a 2-year post-study work visa in Australia. For more details, visit www.homeaffairs.gov.au.
The MSIT-Information Technology Management program teaches data-driven management strategies, technological expertise, and key communication methods while providing a diverse and interdisciplinary curriculum. The program prepares our graduates to tackle IT challenges and lead digital transformation in their organisations. The MSIT-ITM program is ideal for students who not only wish to design and implement technology, but who wish to be leaders in this space with the ability to drive business decisions, communicate value, manage projects, and inspire others.

Information Security Specialisation

The specialisation equips students with a deep understanding of risk management, information security, and data privacy. This program draws upon the expertise in security research, operations, and analysis from the world-famous CERT Division of Carnegie Mellon University’s Software Engineering Institute. CERT is a leader in cybersecurity and has partnered with government, industry, law enforcement, and academia to improve the security and resilience of computer systems and networks for over 30 years.

Careers

As a graduate of our Information Technology Management program, students will have the required skills for positions such as Corporate Operations Engineer, Business Intelligence Analyst, IT consultant, or Software Engineer and to move into managerial roles as their careers progress. Senior positions include Chief Information Officer, Chief Technology Officer and Senior Solutions Consultant.

Tracks

12-Month Track (CRICOS Code 057780G)

Designed for applicants with 3 or more years of professional experience, the 12-month track provides the MSIT-ITM degree in an accelerated format. The track is comprised of 3 semesters of coursework over one year.

21-Month Track (CRICOS Code 072573M)

The 21-month track provides our students with a comprehensive curriculum in technology and implementation, business strategy, professional communication, and management that will prepare them to have an immediate impact on any organization. The track is comprised of 4 semesters of coursework and 1 semester of internship work.

The culture of the company is similar to Carnegie Mellon in many ways - we get a lot of freedom to manage important things by ourselves. My degree also taught me about teamwork, including intercultural experiences, and learning how to deal with conflict and be a team player. I also learnt great communication skills and a passion for work.

Pablo Javier Larrimbe, MSIT
Corporate Operations Engineer – Google, UK

### Information Systems Project
(for 12-month track and 21-month track)

The Information Systems Project enables students to apply their knowledge and skills to develop and recommend solutions to actual public and private companies. The goal is to provide the students with real-world and demand-driven experience for structuring, managing, and executing information systems projects.

### Pittsburgh Exchange
(only for 21-month track)

Students enrolled in the 21-Month track may participate in the exchange program for one study period but must spend their first and last semester in Adelaide.

### Internship
(only for 21-month track)

You will undertake 400 hours of internship with public or private sector firms or non-government organisations to gain in depth real-world work experience.

### Post Study Work Visa
(only for 21-month track)

International students enrolled in the 21-month program may be eligible for a 2-year post-study work visa in Australia. For more details, visit www.homeaffairs.gov.au.
The MSIT – Business Intelligence and Data Analytics program meets the growing needs of organizations to aggregate, analyze, and monetize Big Data. Our programs are aimed at developing an elite set of graduates cross-trained in business process analysis, technology management and technically skilled in all aspects of data science including predictive modelling, analytical reporting, GIS mapping, segmentation analysis, and data visualisation. Students will acquire the skills to integrate cutting edge information and analytics technologies with best practices and applied business methods. Combining business strategy, analytics, IT, and communications classes, the program trains students to be competitive in these rapidly growing fields.

The MSIT-BIDA is ideal for students who wish to delve deeper into the emerging field of analytics, forging expertise that change the way organisations and companies do business around the world.

Careers

As BIDA graduates, students will acquire the skills needed for roles such as Data Scientist, Business Intelligence Analyst, and Application Developer. Senior positions include Chief Information Officer, Chief Technology Officer and Senior Solutions Consultant.

21-Month Track

The 21-month track provides participants with a comprehensive curriculum that includes advanced analytics coursework in machine learning, structured and unstructured data analytics, and predictive modeling. When combined with core technology coursework and experiential learning, the program will arm students with the expertise to become an influencer at any organisation. The track is comprised of 4 semesters of coursework and 1 semester of internship work.

I had always wanted to become a Carnegie Mellon student. As everybody knows Carnegie Mellon is one of the top universities for IT and Computer Science, so it was the best choice for me to pursue the career I want.

Data Analytics Project

The Data Analytics Project enables students to apply their knowledge and skills to develop and recommend solutions to real public and private companies. The goal is to provide the students with real-world and demand-driven experience for structuring, managing, and executing information systems projects.

Internship

You will undertake 400 hours of internship with public or private sector firms or non-government organisations to gain in depth real-world work experience.

Pittsburgh Exchange

Students enrolled in 21-Month track may participate in the exchange program for one study period but must spend their first and last semester in Adelaide.

Post Study Work Visa

International students enrolled in the 21-month program may be eligible for a 2-year post-study work visa in Australia. For more details, visit www.homeaffairs.gov.au.
Master of Science in Public Policy and Management
CRICOS: 070773G

The Global Track within the MSPPM program is a unique dual continent experience in which students complete a world-class public policy and management curriculum at both CMU’s home campus in Pittsburgh and its Australian campus. The program is designed to produce global leaders skilled in policymaking, management and organisational leadership. The students are taught by faculty across the two campuses, providing them with an unparalleled global education. The track is comprised of 4 semesters of coursework and 1 semester of internship.

Concentrations

Students can elect an optional concentration in one of the following policy areas: Cybersecurity and Management, Energy Systems and Public Policy, Environmental Policy, Financial Management and Analysis, Health Policy, International Trade and Development, Management, Policy Analysis, Social Innovation and Entrepreneurship and Urban and Regional Economic Development

Careers

Global MSPPM students gain exposure to job markets all over the world and the majority of our graduates secure jobs in the United States as Congressional Advisers, Department analysts, management consultants and directors.

CMU Institutional Maths Online Test

CMU Institutional Maths Online Test (IMOT) is available as a substitute for GRE and GMAT for CMU-A programs (except global programs).

— The test is free of charge. It is a one hour test comprising 32 multiple choice questions. The topics include basic algebra, calculus and statistics calculations. The test can only be taken once and you will need to achieve a minimum score of 80%.

— Submit your online application. After you have submitted your application, send your request to sit for CMU IMOT to admissions@australia.cmu.edu. CMU-A admissions team will then get back to you with the instructions on how to take the test.

Visit www.australia.cmu.edu for more information on entry requirements

Application Deadlines

August intake closes

30 April

No application fee

Doesn’t apply to global courses.
Fees and Scholarships

At CMU-A, we strive to make a graduate education accessible to talented students of all financial means through numerous scholarship opportunities.
